

# Now you just need to go to your phone's settings and follow its operating system's instructions

## Activating IsraelieSIM on Android operating system

Go to settings > connections > SIM card manager > add mobile plan and choose "scan provider's QR code >

1

Scan the code and approve

To avoid unnecessary charges during your time in Israel, we recommend turning off your primary number in phone settings as follows:

Settings > connections > SIM card manager > switch off

Your plan will activate upon use in Israel

2

## Activating IsraelieSIM on iOS operating system

Go to settings > cellular > cellular plan

Scan the QR code in the screen that opens and tap to approve cellular plan

3

On the subsequent screens define line usage until completion of process:

- \* Labels for cellular plan
- \* Default line for calling phone contacts
- \* Defining default line for IMESSAGE and FACETIME
- \* Defining default line for cellular data usage

To avoid unnecessary charges during your time in Israel, we recommend turning off your primary number in phone settings as follows:  
Settings>Cellular>select desired number>switch off

- \*Ordered a new eSIM? Your data plan will activate only after you arrive in Israel.
- \* Recharging your eSIM? Your data plan will activate immediately upon purchase.
